

The Beatson Institute for Cancer Research have licensed the entire Dotmatics informatics suite

Bishops Stortford, United Kingdom, 16 February 2010

Cutting edge informatics company Dotmatics Limited (Dotmatics) were selected by the The Beatson Institute for Cancer Research (Beatson Institute) to provide a complete range of drug discovery informatics solutions. The Beatson Institute have licensed the entire Dotmatics software suite, including: Browser, Vortex, Studies, Register, Gateway, Pinpoint & Nucleus.

Dr Martin Drysdale, Head of Drug Discovery Programme at The Beatson Institute said: "We are very pleased to be working with Dotmatics. After evaluation of the software we were impressed by the complete package which integrates all aspects of data management, retrieval and mining. We found the software to be user friendly for both chemists and biologists and will continue to work with Dotmatics to improve and tailor the system to our needs."

The Dotmatics suite of solutions increases research efficiency during early stage drug discovery by providing integrated software from [registration](#) to [reporting](#) through data [querying](#), data [visualisation](#) and [assay management](#). The web-based deployment of the suite reduces IT overhead whilst providing unrivalled flexibility through its simple user interface.

Steve Gallagher, CEO of Dotmatics said "Working with institutes such as the Beatson from the ground-up allows Dotmatics to showcase the full scope of its solutions. We are very excited to work with the Beatson Institute to create a fully integrated and highly efficient drug discovery platform"

Why is Dotmatics Chosen by Leading Pharmaceutical and Biotech Companies?

Our [web-based](#) knowledge solutions dramatically improve the way scientific data is queried, browsed, managed, shared and visualised within companies. Dotmatics has significant expertise in [cheminformatics](#) techniques including chemical databases, SAR analysis, [data management](#) and data visualization. Overall we enhance the [strategic decision making process](#), saving time and money whilst enriching the day to day lives of research scientists.

The Dotmatics suite includes:

[Browser](#)- a query and visualization tool for biological and chemical datasets.

[Vortex](#) - world-class visualization and analytics platform for scientific and non-scientific data.

[Studies](#) - the new standard in screening data management.

[Pinpoint](#)(1)- an Oracle cartridge allowing rapid indexing and searching of chemical databases.

[Gateway](#)- a centralised depot for sharing information with colleagues and external collaborators.

[Nucleus](#)- a web-based tool for importing, mapping and storing data from existing sources.

[Register](#)- a web-based tool for single and batch compound registration.

For further information please visit www.dotmatics.com.

(1) Pinpoint is developed in collaboration with Astex Therapeutics Ltd
