

Dotmatics has licensed its browser & pinpoint products to Arrow Therapeutics.

Bishop's Stortford, 2nd May 2008 – Scientific software company Dotmatics is pleased to announce that Arrow Therapeutics (Arrow) has licensed Dotmatics' browser & pinpoint software to facilitate information access and project management. The solution will be used by Arrow to query, browse, analyse and share key drug discovery information across research programs and project teams.

Dotmatics' browser & pinpoint solutions offer the following advantages:

- The use of a zero-client web based approach provides our clients with real-time access to information and reduces IT support overhead.
- Integration with pre-existing informatics tools such as electronic lab notebooks, chemical & biological databases and inventory management.
- An easy-to-use interface allows scientists to make the most of the powerful querying, visualisation and analysis capabilities of the tools, with minimal training.
- High performance indexing and searching of large chemical structure databases including proprietary and commercial compound sources.

Dr. Stuart Cockerill, Research Director at Arrow, said: "We are delighted to be working with Dotmatics, one of the leading providers of informatics systems. These tools will allow us to maximise the use of project data in our drug discovery processes."

Dr Mike Hartshorn, CSO of Dotmatics, said: "We are pleased to provide Arrow with a fully integrated software package which easily operates alongside their current in-house informatics systems."

About Dotmatics

Dotmatics is a scientific software company deploying web-based knowledge solutions that dramatically improve the way scientific data is queried, browsed, managed and shared within companies. Dotmatics has significant expertise in cheminformatics techniques including chemical databases, SAR analysis, data management and data visualization. A privately-owned company, Dotmatics was founded in 2005 and is based south of Cambridge, UK.

Browser is a query and visualisation tool for biological and chemical datasets.

Pinpoint is an Oracle cartridge allowing rapid indexing and searching of chemical databases.
