

Waters Corporation and Dotmatics Limited to Collaborate

Waters MassLynx Mass Spectrometry (MS) Software to Feature New Structural Elucidation Capability

For Immediate Release

Indianapolis, Indiana - June 3, 2007 – Waters Corporation (NYSE:WAT) and Dotmatics Limited today announced an agreement to develop integrated advanced structure elucidation software to complement Waters time-of-flight (ToF) mass spectrometers and the Waters ® Synapt™ and MALDI Synapt High Definition Mass Spectrometry™ (HDMS) Systems. The agreement will focus on developing a fully-integrated solution for structural elucidation of small molecules based on Dotmatics and Waters MassLynx™ MetaboLynx™ Application Manager software.

The new software will give scientists the ability to comprehensively identify ion fragments by more accurately interrogating small molecule MS/MS, or MS E, data for discovery, development, and manufacturing analyses in the chemical and pharmaceutical industries.

"We are pleased to provide researchers with a fully integrated software package which is compatible with our innovative LC/MS/MS and LC/MS E data acquisition strategies that will allow scientists to interrogate fragmentation rich spectra and reduce the bottleneck in deciphering important molecular structures. The combination of Synapt HDMS System and this important collaboration will provide researchers with advanced tools for small molecule profiling," said Dr. Tim Riley, Vice-President and Managing Director – Pharmaceutical Business Operations, Waters Division.

"We look forward to a fruitful collaboration with Waters Corporation" said Alastair Hill, Director and CTO at Dotmatics. "This agreement puts in place a framework to deliver novel software algorithms within the Waters MassLynx software platform which promises to result in huge time savings for scientists."

The Dotmatics structural elucidation software is now available from Waters Corporation as an option for Waters MassLynx software. Additional information on Waters [MassLynx](#) is available at www.waters.com

About Waters Corporation

Waters Corporation creates business advantage for laboratory-dependent organizations by delivering practical and sustainable innovation to enable significant advancements in such areas as healthcare delivery, environmental management, food safety, and water quality worldwide.

Pioneering a connected portfolio of separations science, laboratory information management, mass spectrometry and thermal analysis, Waters technology breakthroughs and laboratory solutions provide an enduring platform for customer success.

With revenue of \$1.28 billion in 2006 and 4,700 employees, Waters is driving scientific discovery and operational excellence for customers worldwide.

About Dotmatics Limited (www.dotmatics.com)

Dotmatics is a scientific software company deploying proprietary web-based tools to dramatically improve the way scientific data is queried, browsed, managed and shared within companies.

Dotmatics has significant expertise in advanced chemoinformatics, chemical databases, SAR analysis, data-management and visualization.

A privately-owned company, Dotmatics was founded in 2005 and is based south of Cambridge, UK. The company has many licensing agreements with international pharmaceutical and biotechnology companies.

Waters, High Definition Mass Spectrometry, HDMS, Synapt, MetaboLynx and MassLynx are trademarks of Waters Corporation.
