

## **Dotmatics Limited Expands its Global presence, by appointing a strategic partner in the Japanese marketplace.**

**Leading Informatics company Dotmatics has signed an agreement with Tokyo based Infocom, to further expand its Global network.**

**Bishop's Stortford, 28<sup>th</sup> October 2009** – Leading Informatics Company [Dotmatics](#) Limited has entered into a strategic relationship with Tokyo based [Infocom](#). Dotmatics and Infocom have identified a large demand for their [query](#) and [visualisation](#) tools in the Japanese market and are working together to provide “dynamic query and visualisation solutions” for major Pharmaceutical companies around Tokyo.

Shojiro Morishita, General Manager of Chem & Bio Informatics department said, “Dotmatics products allow researchers to handle disparate databases easily and have effective visualization tools for efficient decision making in drug discovery.” We can expand our business for supporting [drug discovery](#) using Dotmatics technology including database system, data management, SAR and visualization. We are very excited about launching the Dotmatics' state-of-the-art solutions to researchers in the Japanese market.

### **About Infocom**

[Infocom Corporation](#) offers a variety of IT services and solutions. The Chem & Bio Informatics Department has provided solutions for over 25 years in the drug discovery space covering Chem/Bio-informatics, Proteomics, [Drug Design](#), ADMET and drug development. The department is serving clients in different areas of from research to pre-Clinical and Clinical.

Bill Bailey Global Account Manager at Dotmatics, said: “We are delighted to be working with Infocom and are now able to provide the Japanese marketplace with solutions that will enhance the way that data can be queried and visualised, within the framework of a flexible licensing model.”

### **About Dotmatics**

Dotmatics is a scientific software company deploying web-based knowledge solutions that dramatically improve the way scientific data is queried, browsed, managed, shared and visualised within companies. Dotmatics has significant expertise in cheminformatics techniques including chemical databases, SAR analysis, data management and data visualization.

The Dotmatics suite includes:

[Browser](#)- a query and visualization tool for biological and chemical datasets.

[Pinpoint](#)(1)- an Oracle cartridge allowing rapid indexing and searching of chemical databases.

[Gateway](#)- a centralised depot for sharing information with colleagues and external collaborators.

[Nucleus](#)- a web-based tool for importing, mapping and storing data from existing sources.

[Register](#)- a web-based tool for single and batch compound registration.

[Vortex](#)- an advanced visualization and analytics tool for scientific and non-scientific data.
