

Company Name: dotmatics Limited

Company Outline: dotmatics provides cutting-edge scientific software to the life science industry. Based in Hertfordshire, we have a growing number of customers located in the UK and beyond.

Website: www.dotmatics.com

Vacancy Location: Hertfordshire

Vacancy Title: Java Developer

Vacancy type: Permanent / Contract

Job Description:

The role involves developing and maintaining our web-based software solutions. You will be expected to think creatively: suggesting and implementing new features; writing novel algorithms and redesigning legacy code.

Specific responsibilities:

As a small company, your work will have an immediate impact on our customers, and you will be expected to be able to manage your work with little supervision.

The role may also require you to visit our customer and partner sites in the UK and beyond to gather requirements, perform maintenance and carry out installations.

Formal training will be provided where needed, but we would expect you to learn 'hands-on' alongside more experienced colleagues.

Minimum Requirements:

You will have a degree in Computer Science or similar, or in any scientific discipline with relevant experience.

Experience in the following is essential: Java, Oracle, one or more scripting languages (Perl, ASP, PHP, python etc); SQL; web programming (HTML, JavaScript etc.) and Windows.

Salary: Negotiable

How to apply: CV and covering letter to: careers@dotmatics.com

Address: dotmatics Limited, 21 Hockerill Court, Bishops Stortford, Herts, CM23 5SB
